Notice to the reader

This volume is one of the annexes to a main report on safety effects of road design standards which was compiled by SWOV in collaboration with other European partners, in 1993-1994.

The project was carried out with financial support of the Commission of the European Union. However, no authority of the European Union has responsibility for the contents of this publication.

The main report is a composition of contributions from various authors, edited by SWOV and published in both English and French. The annexes were not re-edited but were published in the form in which they were furnished by the authors. SWOV is not responsible for the contents of annexes that were produced by authors from outside the institute.

The full publication consists of the following volumes.

Main report: Safety effects of road design standards
H.G.J.C.M. Ruyters & M.Slop (ed.); SWOV Institute for Road Safety Research, Leidschendam, The Netherlands

Annex I: Road classification and categorization
S.T.M.C. Janssen; SWOV Institute for Road Safety Research, Leidschendam, The Netherlands

Annex II: Assumptions used in road design
M. Slop; SWOV Institute for Road Safety Research, Leidschendam, The Netherlands

Annex III: Methods for investigating the relationship between accidents, road user behaviour and road design standards
G. Maycock & I. Summersgill; Transport Research Laboratory, Crowthorne, England

Annex IV: International organizations and road design standards
H.G.J.C.M. Ruyters; SWOV Institute for Road Safety Research, Leidschendam, The Netherlands

Annex V: National road design standards
H.G.J.C.M. Ruyters; SWOV Institute for Road Safety Research, Leidschendam, The Netherlands

Annex VI: Road cross-section
L. Michalski; Technical University of Gdansk, Gdansk, Poland

Annex VII: Road design standards of medians, shoulders and verges
C.C. Schoon; SWOV Institute for Road Safety Research, Leidschendam, The Netherlands

Annex VIII: Design features and safety aspects of exit and entry facilities on motorways in the EC (in German)
J. Steinbrecher; Aachen, Germany

Annex IX(E): Curves on two-lane roads
Annex IX(F): Virages sur routes à deux voies (in French)
T. Brenac; Institut National de Recherche sur les Transports et leur Sécurité, Salon-de-Provence, France

Annex X: "Bicycles at intersections" in the Danish Road Standards
L. Herrstedt; Danish Road Directorate, Copenhagen, Denmark

Annex XI: Bicycle facilities at intersections
M.P. Hagenzieker; SWOV Institute for Road Safety Research, Leidschendam, The Netherlands
